

"INFILTRATE"

PRESENTED BY ACE IT

"Infiltrate" is an in-depth training program designed for law enforcement personnel currently assigned to a special investigative unit, those looking to transfer into a specialized unit, or supervisors managing a gang, narcotics, or undercover unit. This unique course is a one-of-a-kind presentation, taught in partnership with a retired 30-year veteran of a Southern California law enforcement agency and his long-term gang CI, who have both worked approximately 75 undercover operations together as a team across the nation, working long term narcotics investigations and solving several homicide cases. Attendees will be taken on a detailed chronological journey of this unique working partnership between law enforcement handler and CI, spanning the last 9-years. The presentation will include case studies with operational videos, audio clips, and photos. This course will provide the knowledge and skills in cultivating and managing confidential informants, executing undercover operations, conducting drug/gang investigations, and much more. The course will also provide a Q&A session between the presenters and the audience to ensure that all questions are answered. This is a class unlike any other, sign up now for the next offering! Due to the intense nature and high profile of the cases involved in this class, the instructor is kept anonymous on any public platforms.
